

## ENGINEER/SENIOR ENGINEER

Do you want to do work that makes an impact in the community you serve? Are you tired of sitting behind a desk designing projects that you never get to see in the field? Do you have the leadership qualities it takes to manage a project from concept to completion? Does working for the largest drinking water utility in the state that is on the leading edge of the industry appeal to you

Central Arkansas Water, an award-winning water utility serving Little Rock, North Little Rock and surrounding areas, is seeking a skilled, innovative leader to serve as Engineer/Senior Engineer. Professional Engineering (PE) license required to qualify as a Senior Engineer.

### Job Summary

- Provides supervision to Engineering employees in design, inspection, planning and new service
- Plans, designs, monitors and administers engineering construction projects
- Coordinates distribution engineering work within and outside the utility
- Performs detailed field work & computer hydraulic analysis
- Subject to call

### Qualifications

- B.S. Degree in Civil, Agricultural, Mechanical, Chemical or Environmental Engineering including hydraulics or fluid mechanics or other acceptable engineering discipline with work experience with water/wastewater utilities, hydraulics, structures and construction
- Registered as an Engineer Intern (E.I.) in Arkansas or another state OR must obtain E.I. in Arkansas within 1 year of hire.
- Must take and pass the Grade IV Arkansas Water Treatment and Distribution Licenses within required timeframes

### Desired Qualifications

- Two or more years of supervisor experience
- Experience using MS Office desktop software including Access
- Experience in the development and use hydraulic models
- Two years technical experience in Water/Wastewater industry
- Courses or experience in electrical, plane surveying, computer aid drafting, and GIS
